BUILDERS' GUIDE TO REUSE & RECYCLING

A Directory for Construction & Demolition Materials in the Metropolitan Washington Region

Published by the Metropolitan Washington Council of Governments ©2006

About the Metropolitan Washington Council of Governments (COG)

Founded in 1957, COG is a regional nonprofit organization of Washington area local governments. COG is composed of 20 local governments surrounding our nation's capital, plus area members of the Maryland and Virginia legislatures, the U.S. Senate, and the U.S. House of Representatives.

About This Directory

Listing in this directory should not be construed as a recommendation or endorsement by the Metropolitan Washington Council of Governments, which is providing the information as a public service to encourage reuse and recycling of materials.

The industry is constantly changing. Some businesses may have reduced or expanded the types of materials they accept. Always call ahead to check material specifications and to find out the terms and conditions required.

This directory is available as an online searchable database and downloadable PDF at
www.BuildersRecyclingGuide.com

Please check the site for the latest updates. To add or update your business info please visit the Web site or call **202-962-3359.**

Alternative formats of this publication can be made available for persons with disabilities.

Where to Go for More Information 43

Acknowledgments 45

INTRODUCTION

Each day, construction and demolition (C&D) companies throughout the Washington metropolitan area toss valuable materials in their trash dumpsters. Most C&D materials are reusable or recyclable in our region: metals, concrete, bricks, asphalt, untreated wood, cardboard, appliances, fixtures, carpet, and more.

Use this *Builders' Guide to Reuse & Recycling* to find out how and where to recover construction and demolition materials in the Washington metropolitan area. The directory of businesses reusing and recycling construction and building materials starts on page 12. The listings are organized by type of material and then by geographical location. Businesses in the District of Columbia are listed first, followed by those in Maryland and then Virginia.

WHY RECYCLE?

Save money: Reuse and recycling save money by avoiding disposal costs. Some programs generate revenue through material resale. C&D materials are high volume and heavy, and the costs to landfill are steep. Disposal fees are typically assessed on a per-unit haul fee plus a per-ton fee.

Meet existing and expanding regulations and goals: Many localities and agencies are requiring builders and contractors to recycle. In the DC area, federal agencies have signed a Memorandum of Understanding that directs project teams to recycle at least 50% of construction and demolition waste. Builders with expertise in reuse and recycling will have a competitive edge now and in the future.

Protect the environment and conserve resources: Construction and demolition materials represent 40% of all raw material used annually in the US economy. Recovering these materials reduces mine and forest extraction, minimizes industrial processing, transportation and distribution, and saves dramatic amounts of energy.

Extend the life of local landfills: Construction and demolition materials comprise a large part of the waste stream, an estimated 25-30% of US solid waste annually. Diverting this material from landfill disposal extends the life expectancy of regional landfills. New landfills are increasingly difficult to site.

Support local businesses: This directory lists more than 100 businesses in the Washington metropolitan area that reuse or recycle construction and building materials.

Construction and demolition materials are easily recyclable: There are more than 20 different material categories that are easily recognizable and, with proper planning, recyclable in the Washington metropolitan area – from antiques and architectural salvage to mixed concrete, asphalt, bricks, and gravel.

Safety: Recycling promotes a cleaner and, therefore, safer work site.

Sample Recovery Vs. Disposal Costs in the Metropolitan Washington Region

Material	Facility Delivered To	$ per 20 cubic yards
mixed building materials	landfill	$615 to $700
mixed concrete, asphalt, bricks, blocks, gravel	mixed construction material crusher, processor, and recycler	$250 to $535
gypsum	gypsum recycler	$500 to $600
metals	scrap metal dealer	$250 to $595
old corrugated cardboard	paper recycler and processor	$250
reusable bricks	used building material resale store	$0 to $100
antiques and architectural salvage	used building material resale store	$35 to $100

Note: Costs include collection fees plus cost to tip loads at facility. Self-haulers can expect to incur significantly less costs. Large generators with regular loads will be able to negotiate the best prices.

Source: Institute for Local Self-Reliance, Washington, DC, May 2006.

Construction Material Recovery Basics

Deconstruction – The careful removal of materials from structures to recover valuable building materials. Deconstruction service companies come onsite to remove valuable materials.

Salvage & Reuse – The recovery of reusable items such as mantels, doors, fixtures, tiles, and hardware (ideally before construction to avoid damage). Old-growth lumber, vintage bricks, and antique fixtures can be rare and quite valuable. Salvaged materials and products can also be installed in new or renovated buildings.

Recycling – Separation of recyclable materials by type on-site. Either self-haul to recovery facilities or contract with a qualified hauler, salvager, or recycler to transport materials to end users. Mixed loads of construction materials can also be delivered to mixed construction and demolition material recycling operations.

Consider recycled products in new construction.

Waste Minimization – Avoiding waste generation in the first place. Use standard size products and opt for durable or recyclable over disposable materials to avoid wasted materials.

10 Tips for Recycling Success at the Job Site

1. Know your materials. Inventory materials and assess what to salvage/reuse and recycle. Then identify possible markets for each type. Knowing markets will help determine how materials should be sorted and stored.

2. Get everyone onboard. Communicate specific job-site material handling procedures to co-workers and contractors to ensure participation. Appoint a recycling supervisor. Involve and train workers. Establish a recognition program to encourage employee participation. Discuss recycling at project meetings. Educate all workers on the project to keep lunch bags, caulking tubes and other trash out of recycling bins.

3. Develop a recycling plan. A waste management/recovery plan addresses what materials will be generated, what procedures will be used, who will haul away each material, and where it will be hauled.

4. Require subcontractors to participate in the recycling program. Develop specific salvage/reuse or recycling guidelines for subcontractors to follow as part of their contracts.

5. Allow time for deconstruction and salvage. Remove salvageable items before demolishing part or all of a building. Wood joists, wood flooring, bricks, cabinets, and architectural details such as mantels and molding are among the most valuable building materials. The DC region supports several enterprises offering deconstruction and salvage services.

6. Consider "time-based" hauling. Using your project schedule, determine what materials are likely to be generated at different points throughout the project. To avoid contamination of recycling dumpsters, effectively schedule dumpster pulls.

7. Select a recycler. Find a hauler or recycler to handle the job. Discuss the project with recycling service providers. Different companies offer different services and materials handling methods. Understand what each is capable of providing. The company you choose may be able to meet all your recycling needs. Consider including the following in the agreement: materials to be recycled, documentation of weight or volume of materials recycled, schedule for container pickup, and how containers will be labeled.

8. Make recycling easy. Clearly mark and locate bins and find locations to temporarily store materials. Include bilingual signs and signage in the language of your workers. Pictures can help non-English-speaking workers. Place recycling bins in a location that will prevent misuse or contamination by the public, and that will be as close to the work as possible. Always provide a trash container next to recycling bins.

9. Monitor. Check recycling containers for contamination and fullness. Visit the site periodically. Check in regularly with subcontractors to ensure they are properly recycling.

10. Document, document, document. Work with haulers, subcontractors and markets to track costs, quantities, and types of materials recovered. Hauling slips can verify recycling amounts.

Frequently Asked Questions

How can I recycle when space at my job site is at a premium? With proper scheduling and containers. Coordinate recycling services with construction schedule, and properly size containers to match job segments and space constraints. Remove materials before they are mixed with materials from the next construction phase. This approach works wells when construction phases generate certain homogeneous materials such as drywall or cardboard. Space for multiple bins can be avoided. Mixed material processing off-site is another possibility.

How do I find a hauler willing to recycle? Word of mouth. Check with companies in this directory. They can often recommend haulers. If you use haulers listed in the Yellow Pages, ask for a reference and consider instructing them to take designated materials to certain end markets. Regardless of whom you choose, ask haulers to document facilities used and to provide copies of weight tickets from every load.

Doesn't recycling take too much time and cost too much? No. Not because of labor—trained workers learn quickly and the steps to recycle are simple. Not because of service—hauling takes the same time whether materials are recycled or trashed. Not because of logistics—recycling is coordinated specifically to the job site and the job schedule. Recycling can save money in avoided disposal costs and can generate revenue through material sales.

Won't deconstruction and salvage delay my schedule? No. Deconstruction can be scheduled during the fixed asset removal, move-out phase. This leaves less work and volume for demolition phase. Deconstruction can uncover areas that need asbestos and lead removal before demolition proceeds.

How do I prevent container contamination? Train workers and supervisors, especially on the use of designated bins. Proper signage on bins is essential. Consider locating bins in a locked or supervised area or having bins with lids to discourage contamination by the public.

Can unsorted loads of demolition or construction waste be recycled? Yes. Our region has facilities that can process mixed loads of construction and demolition debris. These facilities typically use mechanical systems such as crushers, shakers, screens, magnets, and blowers. One downside is that mixed processing typically reduces the value of recovered materials.

Which is better: the source separation method or the mixed material method? The higher onsite costs of a source separation program—in which materials are sorted and each type is placed in its own bin—may be offset by much lower disposal costs and the much higher value of recovered materials. Mixed material systems generally have lower recycling rates and have more difficulty documenting recycling amounts. If space is limited, consider a hybrid system. Use one container for a large quantity of easily recycled material such as cardboard and another for the mixed materials.

What materials require special handling? Lead and asbestos-contaminated materials, solvents, paint thinners, mercury switches, pressure-treated and creosote-treated wood are considered hazardous and are not recyclable. Contact the relevant jurisdiction listed on page 43 for information on proper handling and disposal of hazardous materials.

What are the main obstacles and barriers? Unfamiliar crews, accelerated schedule, stacked trades, multiple materials, limited site space, high recycling goals. Proper planning, training, and specific contract provisions can address these issues.

Recycling Helps Buildings Earn Green Certification

An increasing number of building owners in our region are seeking green building certification via the US Green Building Council's Leadership in Energy and Environmental Design (LEED) program. Buildings can be certified as LEED, Silver, Gold, or Platinum based on the number of points earned. Points are available in five different areas including Materials & Resources, which encompasses construction waste management.

Projects that recycle 50% of their waste can earn 1 point. A 75% recycling rate can earn a second point. An innovation credit point is available for projects achieving 90%+ recycling. To earn construction waste management points, projects must develop a construction waste management plan, identify recycling goals, and quantify waste generated and recycled either by volume or by weight.

Recycling and LEED, What's Important?

- Early planning
- Waste management plan
- Excellent documentation (weights, markets, process)
- Focus on heavy, high-volume and high-value items
- If space allows, be thorough – don't miss a waste
- Report everything

For more information on LEED, visit:
www.usgbc.org/LEED

Important Reminders

- Always call ahead to confirm hours of operation and assure acceptance of materials you wish to recycle.
- Do not bring hazardous or toxic materials, unless you know for certain that the facility accepts them.
- Most recycling facilities reserve the right to reject any load that is too contaminated or otherwise unacceptable. Some will charge penalty fees for too much contamination.
- The purer and cleaner your load, the more valuable it is.
- Arrive in time to unload, pay, and leave before the facility closes.
- Some companies require that you set up an account or sign a contract with them before you can bring your materials.
- Many recycling facilities have safety rules, and some require you to wear a hard hat on premises.

Business Listings Terminology

Buyback:	business will pay for materials.
Donation:	business will accept materials free of charge. You donate your materials to the facility.
Fee:	business will charge for collection service or for accepting dropped-off materials.
Drop-off:	business will accept materials delivered to their facilities (restrictions may apply).
Pickup:	business may provide collection service.

ANTIQUES AND ARCHITECTURAL SALVAGE

Items valued for their historic character or architectural style.

See also Building Supplies and Salvage, p. 13.

DC

The Brass Knob Architectural Antiques, Inc.
202-332-3370
2311 18th St NW
Washington 20009
http://www.thebrassknob.com
Mon-Fri 10:30-6; Sat 10:30-6 Sun 12-5
Materials: hardware, restored lighting, mantels, stained glass, decorative items, other.
Drop-off: buyback; call for an appointment first. Photographs of items may be e-mailed.

The Brass Knob Backdoors Warehouse, Inc.
202-265-0587
57 N St NW
Washington 20001
http://www.thebrassknob.com
Mon-Fri 10:30-6; Sat 10:30-6
Materials: pre-1960 doors, bathtubs, sinks, plumbing hardware, ceramic tile, radiators, iron fencing, bricks, decorative architectural elements, other.
Pickup: buyback; provide crew to gather materials on site.
Drop-off: buyback; call before coming.

MD

Kemper Corp.
301-725-0522
11035 Guilford Rd
Annapolis Junction 20701
Mon-Fri call; Sat call
Materials: bricks only (at least 100 years old).
Pickup: depends on value and distance.
Drop-off: appointment required.

Mt. Rainier Antiques, Thrift, & Salvage
No phone at store
301-779-1740 #5 (voice mail)
3815 34th St
Mt. Rainier 20712
Thu-Sat 12:30-5:30 (usually)
Materials: mantels, doors, lighting, stained glass, stonework, ironwork, hardware, decorative architectural elements, bathroom and kitchen fixtures, other.
Pickup: buyback (will buy complete or partial estates).
Drop-off: buyback; before bringing items, visit store during business hours, leave phone message, or mail descriptions.

The Newel Post
301-627-4499
7600 Jefferson Ave
Landover 20785
http://www.pgchct.org/newelpost.html
First Sat of month; Sat 10-1 by appt
Materials: pre-1940 windows, shutters, lighting, plumbing hardware, sinks, toilets, newel posts, spindles, staircase railings, exterior railings, nails, trim, other.
Drop-off: donation; by appointment only. Come prepared to help unload. Bring a dolly, if necessary. Located at a Prince George's County Schools facility. All-volunteer organization. Proceeds benefit Prince George's County Historical and Cultural Trust.

Vintage Lumber
800-499-7859
1 Council Dr
Woodsboro 21798
http://www.vintagelumber.com
Mon-Thu 5:30-4
Materials: lumber, large timbers, and heavy framing.
Pickup: buyback; provide crew to gather materials.
Drop-off: buyback or fee; call to discuss specifics.

APPLIANCES – REUSABLE

For companies accepting reusable appliances, see Building Supplies and Salvage, p. 13. Items must be clean, dry, and working.

Scrap appliances: see Metals – Scrap, p. 26.

BRICKS AND BLOCKS – REUSABLE

See Building Supplies and Salvage, below.

Also see Antiques and Architectural Salvage, p. 12.

Broken bricks/blocks: see Concrete, p. 19.

BUILDING SUPPLIES AND SALVAGE

A wide variety of reusable building materials and supplies.

Materials and items must be in reusable condition.

MD

Alpha Ridge Landfill
410-313-6444
2350 Marriottsville Rd
Marriottsville 21104
http://www.co.ho.md.us/DPW/Alpha_Ridge_Landfill.htm
Mon-Fri 8-4; Sat 8-4
Materials: see The Loading Dock, p. 15.
Drop-off: drop-off point for The Loading Dock. Load must come from Howard County. Be prepared to unload it yourself. Contractors must obtain a permit. Large loads should go directly to The Loading Dock.

Community Forklift
301-985-5180
4671 Tanglewood Dr
Edmonston 20781
http://www.communityforklift.com
Thu-Fri 8-4; Sat 8-4
Materials: antiques and architectural salvage • bricks—stacked on pallets • plumbing hardware and fixtures • ceramic tiles • doors and windows • appliances—only with other materials, cleaned, and working • siding and exterior trim • paint—make thumbprint of paint on top of can to indicate color, full cans or 5 gal. • wood products—clean, denailed, and not warped • cabinetry • flooring—all types, must be reusable, clean and denailed • drywall—4'x4' or larger sheets w/o water damage • carpet—8'x8' or larger, clean, unstained, rolled and taped, dimensions written on tape • ceiling tiles—undamaged and unstained • marble • roofing—must be reusable • other reusable building supplies.
Pickup: donation; 24-foot box truck; reimbursement for gas appreciated.
Drop-off: donation; appointment required. Donations accepted Tues-Sat. Donors will receive tax deduction letter.

Frederick Non-Profit Building Supply
301-662-2988

105 E South St
Frederick 21701

Tue 2-8 Wed 2-6 Thu 12-6 Fri 10-6; Sat 9-4

Materials: antiques and architectural salvage • bricks • plumbing hardware and fixtures • cabinetry—must include all doors and drawers • ceramic tiles • siding and exterior trim • doors and windows • marble • appliances—clean, dry, and working • electrical components—residential only • ceiling tiles • flooring—anything that is reusable, used hardwood must be clean and denailed • drywall—4'x4' or larger • carpet—commercial and residential, new and used, clean and free of stains • paint—no oil-based or dried paint • roofing—any reusable shingles or metal • wood products—at least 4' long, clean, denailed, and not warped • other reusable building supplies.
Pickup: donation; D.C., Maryland, Northern Virginia. Call 301-748-8717.
Drop-off: donation; only during regular business hours.

Habitat for Humanity Restore
301-947-3304

9100 Gaither Rd
Gaithersburg 20877

http://www.habitat-mc.org
Mon-Fri 10-5; Sat 9-4

Materials: antiques and architectural salvage • plumbing hardware and fixtures—no radiators • cabinetry • ceramic tiles • siding and exterior trim—new only, no metal • doors and windows—no incomplete windows • appliances—clean, dry, working and less than 7 yrs old • flooring—used hardwood must be clean and denailed; all other types, new, rolls at least 6'x6' • wood products—clean, denailed, and not warped • electrical components • carpet—only unused wall-to-wall carpeting • paint—only unused latex paint in an unopened can • drywall—new, full sheets only • roofing—new roofing only • other reusable building supplies. No bricks, no ceiling tiles.
Pickup: donation; 15-foot box truck; Montgomery County only.
Drop-off: donation; arrive at least 30 minutes before closing.

Renovation Station (Habitat for Humanity)
410-437-7755

8101 Fort Smallwood Rd
Curtis Bay 21226

http://www.arundelhabitat.org
Wed 9-1 Thu-Fri 10-5; Sat 9-3

Materials: antiques and architectural salvage • plumbing hardware and fixtures—no radiators • cabinetry • ceramic tiles • doors and windows—no shower doors • marble • appliances—clean, dry, and working (no dishwashers, no used air conditioners) • flooring—must cover more than 10 sq yds, hardwood must be clean and denailed • wood products—clean, denailed, and not warped, no used wood, except for hardwood flooring • electrical components—residential only, no fluorescent light fixtures, no thermostats • other reusable building supplies. No roofing, siding, bricks, glass, paint, carpet, or drywall.
Pickup: donation; 14-foot box truck; mainly Anne Arundel County.
Drop-off: donation; arrive at least one hour before closing.

Second Chance
410-385-1101

1645 Warner St
Baltimore 21230

http://www.secondchanceinc.org
Tue-Fri 9:30-4; Sat 9:30-4

Materials: antiques and architectural salvage • bricks • glass • plumbing hardware and fixtures • cabinetry • ceramic tiles • siding and exterior trim—no used vinyl • doors and windows • marble • appliances—clean, dry, and working (no water heaters more than 3 years old) • electrical components • drywall—new only • flooring—used hardwood (clean and denailed), vinyl and linoleum (new only), other (reusable only) • wood products—clean, denailed, and not warped (no used dimensional lumber or molding) • roofing—slate tiles (new and used), all other (new only) • ceiling tiles • paint—new only • other reusable building supplies. No carpet.
Drop-off: donation; forklift available. Call ahead for heavy loads.

Shady Grove Transfer Station and Recycling Center
301-840-2370

16101 Frederick Rd
Derwood 20855

http://www.montgomerycountymd.gov
Mon-Fri 7:30-8; Sat 7:30-5 Sun 9-5

Materials: see The Loading Dock.
Drop-off: drop-off point for The Loading Dock. Load must come from Montgomery County; be prepared to show proof. Be prepared to unload yourself. Loads brought by any vehicle larger than a pickup truck should go directly to The Loading Dock.

The Loading Dock
410-558-3625

2 N Kresson St
Baltimore 21224

http://www.loadingdock.org
Mon-Fri 8-4; Sat 8-4

Materials: antiques and architectural salvage • bricks • plumbing hardware and fixtures • cabinetry—must include all doors and drawers • ceramic tiles—new • doors and windows • marble • appliances—clean, dry, and working (must be less than 5 years old) • electrical components • flooring—all types, must be reusable, hardwood must be clean and denailed • carpet—new squares or contractor remnants only • roofing—shingles full pack & rolls • wood products—clean, denailed, and not warped, studs must be at least 4' long • drywall—4'x4' or larger • ceiling tiles—reusable • siding and exterior trim—vinyl only, must be new • other reusable building supplies. No glass.
Drop-off: donation; call before coming. Forklift and dock available. Drop-off locations also at Alpha Ridge Sanitary Landfill and at the Shady Grove Transfer Station (no forklift nor dock available at these sites).
Pickup: donation; stakebody truck; Maryland and the District of Columbia.

Vintage Lumber
800-499-7859

1 Council Dr
Woodsboro 21798

http://www.vintagelumber.com
Mon-Thu 5:30-4

Materials: wood products—antique lumber only, no modern framing or finish lumber.
Pickup: buyback; provide crew to gather materials.
Drop-off: buyback or fee; call to discuss specifics.

VA

Habitat for Humanity Restore
703-369-6145
9506 Center St
Manassas 20110
http://www.habitatpwc.org
Mon-Fri 9-5; Sat 9-4
Materials: antiques and architectural salvage • bricks • plumbing hardware and fixtures—no cast-iron tubs • cabinetry—must have all doors and drawers • ceramic tiles—must cover at least 25 sq ft • doors and windows—complete units only, no storm windows • marble • electrical components—residential only, no fluorescent or recessed light fixtures, no HVAC components • appliances—clean, dry, and working • flooring—must cover at least 25 sq ft, hardwood must be clean and denailed • drywall—full sheets only • carpet—10'x10' or larger • paint—full, unopened cans of latex paint only, no oil paint, no rusted cans • wood products—clean, denailed, and not warped, no hardwood flooring less than 25 sq ft • other reusable building supplies. No siding or roofing.
Pickup: donation; 12-foot box truck.
Drop-off: donation.

Habitat for Humanity Restore
703-360-6700
7770-G Richmond Hwy
Alexandria 22306
http://www.restorenova.org
Mon-Fri 10-5; Sat 9-5
Materials: antiques and architectural salvage • bricks • plumbing hardware and fixtures • cabinetry • siding and exterior trim—unused only • doors and windows • marble • appliances—clean, dry, and working (gas appliances must be new) • flooring—only hardwood (clean and denailed), new marble, and leftover vinyl • drywall—new only • carpet—new or remnants, clean, rolled, roll secured with tape • paint—unused, clean, at least 3/4 full • roofing—new shingles only • wood products—clean, denailed, and not warped • electrical components • other reusable building supplies. No ceramic tiles.
Pickup: donation; Arlington, Alexandria, Fairfax.
Drop-off: donation.

CARDBOARD

Old corrugated cardboard (OCC).

Fees and buybacks depend on current market conditions.

Cardboard must be dry, clean, free of oil, grease, and wax, and boxes must be broken down.

MD

Allied Waste
410-350-0325
5800 Chemical Rd
Baltimore 21226
http://www.disposal.com
Mon-Fri 4-4; Sat call
Materials: cardboard.
Pickup: fee; roll-off; call 410-727-6161.
Drop-off: fee; contract required. Fee reduced for significant amounts.

Canusa Hershman Recycling
410-319-0319
6401 Quad Ave
Baltimore 21205
http://www.chrecycling.com
Mon-Fri 7-4; Sat 7-12
Materials: cardboard.
Drop-off: buyback.

Georgetown Paper Stock Company
301-762-6990
14820 Southlawn Ln
Rockville 20850
Mon-Fri 6:30-2:30
Materials: cardboard.
Pickup: fee/buyback; roll-off.
Drop-off: fee or buyback.

Modern Junk and Salvage
410-669-8290
1423 N Freemont Ave
Baltimore 21217
Mon-Fri 8-4:30; Sat 8-3
Materials: cardboard.
Pickup: fee/buyback; roll-off.
Drop-off: buyback.

Owl Paper
410-282-0066
1900 Graves Court
Dundalk 21222
Mon-Fri 8-4:30; Sat 8-12
Materials: cardboard (no municipal waste).
Pickup: fee/buyback.
Drop-off: usually buyback; fee charged for trash.

Reliable Recycling
301-663-4482
502 N East St
Frederick 21701
Mon-Fri 8-4:30; Sat 8-12
Materials: cardboard.
Pickup: roll-off; fee may apply for small amounts or long distances.
Drop-off: buyback.

Waste Management, Inc
301-499-1707
1000 Ritchie Rd
Capitol Heights 20743
http://www.co.pg.md.us/Government/AgencyIndex/DER
Mon-Fri 8-4
Materials: cardboard.
Drop-off: fee.

Waste Management, Inc
703-207-9100
2801 Dorr Ave
Fairfax 22031
http://www.recycleamerica.com
Mon-Fri 5-5
Materials: cardboard.
Drop-off: fee/buyback, no cash.

VA

Capitol Fiber
703-658-0200
6610 Electronic Dr
Springfield 22151
http://www.chrecycling.com
Mon-Fri 5-8; Sat 6-1:30
Materials: cardboard.
Drop-off: buyback only for those who have an account.

Waste Management, Inc
703-250-0500
10400 Premier Court
Burke 22015
http://www.recycleamerica.com
Mon-Fri 6-5; Sat 6-12
Materials: cardboard.
Drop-off: buyback only under contract.

CARPET AND PADDING

For companies accepting reusable carpets and carpet remnants, see Building Supplies and Salvage, p. 13.

DC

Ace Waste
845-750-0775
Call for directions.
Washington
http://www.carpetrecycling.com
Mon-Fri 8-5; Sat 9-12
Materials: carpet • carpet padding.
Pickup: fee; roll-off.
Drop-off: fee.

MD

Baltimore Foam Recycle Center
800-787-3626
3761 Commerce Dr, Ste 406-408
Baltimore 21227
http://www.recyclefoam.com
Mon-Fri 7:30-4
Materials: carpet padding—flexible polyurethane foam only, no carpet.
Pickup: buyback.
Drop-off: buyback; will pay more if baled.

D.C. Foam Recycle Center
301-502-6410
8107 Cryden Way
Forestville 20747
http://www.recyclefoam.com
Mon-Fri 7:30-4; Sat 7:30-12
Materials: carpet padding—flexible polyurethane foam only, no carpet.
Pickup: buyback; trailer or container; large quantities.
Drop-off: buyback.

VA

D.C. Foam Recycle Center
703-256-4435
5700-F General
Alexandria 22312
http://www.recyclefoam.com
