

Discovery Day: Model Building

**Sunday, April 23
1:00 - 4:00 pm**

Gaithersburg Community Museum

9 South Summit Avenue
Olde Towne Gaithersburg

Model building is a great hobby that produces scaled versions of everything from ships and automobiles to rockets, buildings and even military figurines. Our April 23 Discovery Day encourages visitors to explore the hobby and will feature exhibitors, demonstrations and model building activities.

The Gaithersburg Community Museum invites model building organizations, individuals and related retail businesses to participate in this first-time event. There is no fee to participate; however we are asking hobby businesses to donate model kits or gift certificates that the Museum may use as prize giveaways.

Organizations, demonstrators and businesses: Space will be provided.

Individual exhibitors: Space will be provided for a model display as part of a one day exhibit, with staff oversight

The event will be held throughout the Museum complex, both in the building and rail cars and outside in the plaza and on the deck, where most of the exhibitor booths will be located. (The Museum will contact participants if there are last minute weather complications.)

To participate in the event, please fill out the application on the back of this flyer and mail to:

Gaithersburg Community Museum
