

“Engaging My Community”

Janely Sanchez
Gaithersburg Elementary School
Teacher: Ms. Chu

If I were mayor of the City of Gaithersburg I would make sure to present Gaithersburg as one of the best cities in the world. I would promote individual participation and encourage them to give feedback on things that they would like to see. This ensures that the community is actively participating and involved with what occurs. I would encourage the use of solar panels so that we can cut down on fossil fuels, and take advantage of the resources that we have. The next thing I would do is to promote the idea of enjoying more time in nature to see all the beauty and greatness that can be missed when staying inside.

I would encourage the citizens to start community gardens so we can grow some food from right here at home. This would cut down on the fossil fuels needed to import some of the food which we could easily grow in our back yards. The involvement of citizens in the community is vital to help our city grown and prosper. As mayor I would advertise the involvement of individuals with in the community to help those in need through the use of the internet and social media. Keeping the youth involved and learning about the community is extremely important because they are the ones who will be at the head of the community in the future. As mayor I would open more youth centers that challenge kids to start projects that will benefit there, neighborhoods, schools, and community as a whole. Being mayor is a difficult job, but with the help of the community we can make it better.
