Subject: Comments on DeVol application SP-8415-2020

This email is from an EXTERNAL source. Please use caution when opening attachments, clicking links, or responding.

Council Members,

I am writing to express my concern and ask you to reject the proposed crematorium at DeVol's Funeral Home (the proposed DeVol application SP-8415-2020).

This is a residential area, and currently very little is known about the long-term health effects of emissions produced by cremators. The proposed site is about 1,000 feet from my house and even closer to other houses on my street. I have a young child at home and there are multiple daycares on my street, not to mention many older residents in the neighborhood who may be particularly vulnerable to airborne toxins. To think that they would be exposed to toxic chemicals in the air on a daily basis is terrifying.

In the application materials I found no mention of an assessment of the potential impacts on the air quality in the surrounding areas from the crematorium, except in letters of concern from members of the community. This is especially concerning given that recent research has found that crematoriums can emit significant toxins into the air that are harmful to human health. See for example this peer reviewed article available from the National Institutes of Health (<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5931459/>):

Xue, Y., Cheng, L., Chen, X., Zhai, X., Wang, W., Zhang, W., Bai, Y., Tian, H., Nie, L., Zhang, S., & Wei, T. (2018). Emission characteristics of harmful air pollutants from cremators in Beijing, China. *PloS one*, 13(5), e0194226. <https://doi.org/10.1371/journal.pone.0194226>

I am also concerned about property values and what this would mean for my neighborhood. Prospective buyers would likely see the crematorium when entering the neighborhood, and may notice poor air quality when visiting homes for sale.

I also feel that it would be particularly unfair to the residents of East Gaithersburg to build a crematorium near our residential community. I am sure that a crematorium would never be allowed in other residential areas of the city such as Downtown Crown or Kentlands, and it should not be allowed here.

For these reasons, I urge the City of Gaithersburg to reject Concept Site Plan SP-8415-2020.

Sincerely,

Jeffrey Taylor

Good Morning,

We apologize that you did not receive the notice before the meeting on Tuesday. The meeting was organized by the Applicant and was not a City sponsored event. To the best of our knowledge the meeting was recorded. I would recommend that you contact Scott Wallace, the Applicant's Attorney. His contact information is swallace@MilesStockbridge.com and 1-301-517-4813. Please note that the record for the application is open until 5pm on September 16th.

This email is from an EXTERNAL source. Please use caution when opening attachments, clicking links, or responding.

The notification came thru US Mail. All Federal agencies such as EPA, NIH, Army Corps of Engineers, all congressional offices hold meetings with the community regularly and 20 to 30 working days is pretty standard procedure.

I expect City of Gaithersburg and their vendors should follow the same procedure. Any thing less means the vendor is trying to sneak unwanted results.

Thanks
Avi Sood

I received "Notice of Virtual Informational meeting" today 10 Sep 2020 from Miles & Stockbridge company when the meeting was held a day before . The letter is dated Aug 28, 2020 but I received today.

Meeting like these are held and information is given 30 to 40 days in advance but this vendor is only giving 8 working days.

It is clear cheating the system and I request the virtual meeting should be held AGAIN and let the community collect them selves and have a joint open discussion.

The way the vendor is trying to hide and squeeze a permit clearly shows his heart is not at the right place. I am enclosing the Miles Stockbridge ltr which was mailed on Friday 28 Aug 2020. Meeting on 9 Sep 2020. There are 2 weekends during this period.

Thanks
Avi Sood

Subject: SP-8415-2020 10/14 East Deer Park Ave; Gaithersburg; MD 20877 Concept Site Plan by DeVol Funeral Home of Crematory

This email is from an EXTERNAL source. Please use caution when opening attachments, clicking links, or responding.

1. My name is Avi Sood. This letter is from Me and my wife. We live on 219 East Deer Park Dr. about 2000 ft from the place where crematory is planned.

2. Our request not to give a permit to build a crematory based on HEALTH HAZARD and SAFETY HAZARD.

3. Every crematory releases Mercury in the air, which has been proven is unsafe by EPA [Mercury and Air Toxics Standards | US EPA](#) <https://www.epa.gov/mats> . There are over 3000 Superfund sites within USA which are on the EPA books polluted with Mercury and now to be cleaned. We don't want DeVol becomes another superfund site 50 years from now in the future which would reflect BAD and POOR decision by City of Gathersburg.

4. Since I have respiratory problems it means living in a neighborhood and inhaling air polluted with mercury vapors.

In one of article by NIH (National Institute Of Health) states "In **mercury vapor inhalation**, death has occurred from **respiratory failure**. Postmortem studies have shown severe damage to the bronchi and bronchioles with marked alveolar edema². In the presence of necrosis, complications such as interstitial emphysema, pneumomediastinum and pneumothorax can occur⁴).

Article by NIH which is enclosed tells all

[Mercury inhalation poisoning and acute lung injury](#) <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4531943/>

5. Something like this, where a vendor is trying to build a crematory within the residential neighborhood has come many times in USA. It happened in Atlanta GA. Below is the summary

State Sen. Brandon Beach, R-Alpharetta, has filed a bill that could head off future battles over the location of crematoriums.

Beach's bill would ban them within 2,000 feet of a residential neighborhood, an increase from the current 1,000 foot limitation, and would also strike the term "stand-alone" crematorium from the Georgia code.

Metro Atlanta has seen several nasty fights over such facilities in recent years. Funeral home operators say the percentage of people wishing cremation keeps increasing, and that the incineration process is safe. Opponents fear that harmful chemicals could be released, posing a risk to nearby residents, particularly children. And they claim property values drop and traffic increases.

Residents of the Towne Lake area of Woodstock started a campaign recently after County Commissioner Brian Poole announced plans for a funeral home and crematorium near a heavily-residential area.

Their issues where that there are health risks associated with living so close to a crematory; quality of life will be diminished; it's too close to Etowah High School (a tenth of a mile away); property values will drop and traffic will increase.

6. We request such a permit NOT be given. My home is about 2000 ft but there are other houses as close as 100 ft of this proposed crematory. Since this is old neighborhood and there are many senior citizens living close to this place and respiratory problems is more prevalent among seniors.

7. If a crematory is allowed to be built, "City of Gaithersburg" standing among the places to live will certainly go down and can expect lawsuits based on Health and Safety reasons.

8. Please feel free to have open discussions with me.

Thank you,

Very truly

Avi Sood

Mercury inhalation poisoning and acute lung injury

Acute mercury inhalation poisoning is a rare cause of acute lung injury. It is usually fatal because of progress...

Subject: Crematorium application SP-8415-2020.

This email is from an EXTERNAL source. Please use caution when opening attachments, clicking links, or responding.

Good evening council members,

I write to you with a great disappointment that our city is evening considering approving this application.

Some points to consider:

- How does this new development/addition enhance and improve our neighbourhood in any way?
- How can a crematorium that emits dangerous chemicals be allowed in a residential neighbourhood which includes parks and schools?

- Comparison are done with Pumphrey's in Bethesda however this should not be compared to them since it was grandfathered and existed prior to the immediate residential buildings to it

- Devol states there will not be additional traffic however that cannot be true why else would they apply for a bigger parking lot

I am in shock that this is even being considered in a residential area. Ask most if not all residents and we support businesses that benefit our community. Does the current situation of COVID-19 not remind us that HEALTH and SAFETY is on top of the list that matters most to human life? There is plenty of evidence that burning bodies in a incinerator causes pollutants in the air around the surrounding areas where it is located. This type of business should not be located in or adjacent to a residential area period. It's extremely sad and disappointing to me that the city is considering this although I can not be totally shocked as you are allowing a 24 hour Wawa gas station to be built behind my home right next to my playground where my babies play. This is definitely a environmental injustice to our community. Both the Devol's proposed crematorium and Wawa's gas station would NOT have been approved in a residential area in Montgomery county why does Gaithersburg think this would be OK for our city. Anyone who lives here or visits Gaithersburg can see a difference between the East and West side of Gaithersburg. The demographics between the East and West side show the differences between income, race, health coverage, transportation etc. Something some people tend to forget is that even if this were to be in compliance with city code it does not mean it is ethically right. History in our country has shown a lot of injustices through centuries/decades of wrongdoing. Sometimes things get fixed later on but at that point the damage has been done. Let's do the right thing and vote NO to the crematorium.

I sincerely hope that you further review the application and reconsider your stance on this issue and not approve the application.

V/R,

Mónica Lozada

goggingg@aol.com

The Honorable Mayor of Gaithersburg, Jud Ashman
Gaithersburg City Hall
31 S Summit Ave., Gaithersburg MD 20877

Dear Mayor Ashman, Gaithersburg City Council Members, and Gaithersburg City Planner,

My husband and I, along with many other residents who live in the vicinity of DeVol Funeral Home, have found ourselves confronted with the onerous task of having to take a 'crash-course' in the subject of crematoria in order to familiarize ourselves with the issue that we are quite suddenly confronted with: i.e., the possibility that a crematorium would be built near our homes. In the process of becoming as well-informed as possible regarding the matter, we have, in effect, been subjected to many graphic images and details of what is entailed in the operation of such facilities.

Among the information I have read, I learned that crematorium related accidents can - and do - occur, and that they can be caused either by human error or by equipment malfunctions. (In a recent case in California, a malfunction resulted in the visible release of large plumes of smoke and pollutants which were ejected from the smokestack of the facility).

We, the residents of Gaithersburg who live in the East Deer Park area, are concerned about the physiological effects that toxins emitted by a crematorium located near to our homes could have on us.

The possibility of having a crematorium so close to our home is causing a great deal of stress in our lives, and I have to wonder, are we not to be afforded the same rights to the enjoyment of our properties as are others who are not so unlucky as to have a crematorium planned for their neighborhood? If I have read correctly with regard to zoning ordinances, would these rights not include being allowed to enjoy the use of our homes without our enjoyment being disrupted by businesses which are not in harmony with our residential area?

Frankly, I would like to know how a person should reasonably be expected to take pleasure from his/her home-environment while smelling (and possibly seeing) the results of the burning of human flesh just yards away, to state things in an aptly blunt way.

What enjoyment would there be in knowing that opening a window would result in pollutants from the incineration of bodies to enter, instead of bringing in fresh air? How would one enjoy looking out of a window and seeing a plume of what used to be a living human being coming out of a smokestack, whether the smoke would be clearly or faintly visible?

DeVol Funeral Home states that the crematorium would fit in architecturally, but for those of us who live nearby, the appearance of the structure is not of very much consequence, since we know its purpose; The house would not be 'in disguise' to us!

Are we, the people who live in proximity to the funeral home, expected to remain unaffected by the knowledge that our homes and our belongings would become imbued with the residues and odors and toxins which would, inevitably, in time permeate our belongings due to the numerous bodies that would be burned nearby?

My husband and I are long-time residents of Gaithersburg. We would be very sorry to move away from here, but we feel that we would have to do so, should the crematorium be permitted: I have an autoimmune illness, which is the main reason why we do not want to be exposed to even so-called 'low' levels of toxins emitted by a crematorium.

We request that the following points be added to the city council's records:

We ask that we be kept informed in a timely manner (either in writing, before the city council's final meeting, scheduled for October the fifth, or via an addressing of the matter by an official of the DeVol

Funeral Home during the council meeting of September the fifteenth) as to when the cremations would begin to take place, should the petition to add a crematorium be permitted: This is so that we would be able to prepare in advance to move out of our home before the first cremations occur.

I have sent a separate e-mail to the mayor and city council today which recaps what I have written here regarding this matter, and which states a further related request for information from DeVol Funeral Home. We ask that those points also be addressed during the city council meeting on September the 15th, and that they be passed on to representatives of DeVol Funeral Home.

We estimate that we would need, at the very least, four months to complete our move. We believe that this would be a reasonable amount of time to request. (Less than that would put an additional burden on us). To clarify, we are asking that we be informed, before the City Council's decision is made on October the 5th, as to how long it would take from the day that approval is granted until the time that the crematorium would become functional.

Should it be that the crematorium were to be completed before the end of the four month period, we ask that an extension of the time before cremations begin to be performed be made available to us (up until the end of the four- month period, or more,) so that we would be able to finish our move before cremations begin. As it is, we feel that that is the least DeVol Funeral Home could do, after the stress they've caused us; we do not think that we should be forced to leave under extreme time pressure on top of all else.

I will also be sending a separate email today to the mayor and city council, containing the above requests and questions that we have for Vol Funeral Home. (I believe that listing those points in a separate email would make them easier to refer to).

My family, including I myself, were refugees after the second world war; I do not want to face a situation which feels even a little similar to what I experienced earlier in life. (None of this situation is due to our actions).

DeVol Funeral Home says that the reason that they want to add a crematorium is that they wish to serve the community, but surely those ends could be achieved in a better and more complete way: One which would allow the funeral home to meet the needs of the diverse populations that they serve, while at the same time taking into account the interests and legitimate concerns of the residents of the nearby community, which includes a large minority presence.

We hope very much that a more suitable place can be found for the location of a crematorium, somewhere at a good distance away from where people live. Perhaps that might entail constructing a new funeral home wherever the crematorium might be placed, in order to keep the two facilities together, as the proximity of one building to the other seems to be a key issue for DeVol.

Regards,

Mai Liis Goggin

Subject: Request For Information From DeVol Funeral Home

This email is from an EXTERNAL source. Please use caution when opening attachments, clicking links, or responding.

The Honorable Mayor of Gaithersburg, Jud Ashman, Members of the Gaithersburg City Council, and Gaithersburg City Planner,
Gaithersburg City Hall
31 S Summit Ave., Gaithersburg MD 20877

Dear Mayor Ashman, Gaithersburg City Council Members, and Gaithersburg City Planner,

Below, is a recap of part of an email which I sent to you earlier today (Sept. 12th) regarding my request for information about possible construction of a crematorium at 14 E. Deer Park Dr. Should the petition be granted, my husband and I would move away from Gaithersburg.

I have added to this another request (point 4), below, which is not included in the previous email of Sept. 12th. (We ask that it also be included in the city council's records).

We request that all the points, below, be passed on to DeVol Funeral Home's representatives (perhaps at the Sept. 15th city council meeting or through any other official communication before the final decision regarding the crematorium is made on October the 5th). Our decision as to whether to move out of our home in Gaithersburg depends on whether or not Resolution SP-8415-2020 passes.

We ask that representatives for DeVol Funeral Home provide us with responses to the following points in a timely way (as stated below). Alternatively, we request that we be contacted by the the mayor's office or by a City Council member or other representative of the City with replies to our requests for information from DeVol Funeral Home.

Answers to the requests listed below would make moving from our home (which we would need to do, should it come to pass that the petition for adding the crematorium is granted) a little easier

Thank you in advance!

Recap of Points Made in My Previous Email of Sept. the 12th Regarding DeVol Funeral Homes Plans for Adding a Crematorium:

1. We ask that we be kept informed of responses by DeVol to the below listed points. (Perhaps this could be done during the City Council meeting of September the 15th)? This is so that we would be able to prepare in advance to move out out of our home before the first cremations take place.
2. We estimate that we would need, at the very least, four months to complete our move. We believe that this would be a reasonable amount of time to request. (Less than that would put an additional burden on us). To clarify, we are asking that we be informed, before the city council's decision is made on October the fifth, as to how long it would take from the day that approval is granted until the time that the crematorium would become become functional.
3. Should it be that the crematorium were to be completed before the end of the four month period, we ask that an extension of the time before cremations begin to be performed be made available to us (up until the end of the four month period, or more) so that we would be able to finish our move before cremations begin. As it is, we feel that that is the least DeVol Funeral Home could do after the stress they've caused us; we do not think that we should be forced to leave under extreme time pressure on top of all else.

An Additional Point (Which Was Not Included in My Earilier Sept. 12th Email), Which We Ask to Also Have Included in the City Record:

4. We ask that DeVol Funeral Home notify us in a timely manner (within two weeks or sooner) by postal service mail at the above address, or by phone at 301-963-9079, in advance of when the crematorium is ready to begin operations to let us know that they are ready to commence with the incinerations. As an alternative to this, we request that this information be passed on to us by a Gaithersburg City Council member or other representative of the city who is in contact with the funeral home.

Thank you in advance for your attention to this matter!

Mai Liis Goggin
